OPERATION OF DOS GAMES THROUGH OPERATING SYSTEMS OTHER THAN DOS:

Windows 3.x

We do not recommend or support operation of any DOS-based titles through Windows 3.X. To exit Windows into DOS, in Program manager, click on 'File' and then 'Exit', to enter DOS. You should be placed at a C:\prompt. From here, follow the instructions on the insert to run the game through DOS.

Windows 95

Although Windows 95 is very friendly towards the majority of DOS-based games, you will experience the best performance in true DOS. If you encounter any problems running a DOS-based game through Windows 95 we recommend you restart the computer into MS-DOS mode, and try the game from there. (Click on 'start' on your taskbar, then click on 'shutdown', and select 'restart from the computer into MS-DOS mode'). If you experience trouble with your CD-ROM (for example, get an error message that states 'Invalid Drive Specification') or Sound Card in DOS, your system may not be configured for operation through DOS. Some Windows 95 systems are shipped without DOS-based CD-ROM or Sound Card drivers installed. Contact your computer manufacturer for these drivers.

INSTALLATION INSTRUCTIONS:

Restart your computer in DOS mode only

From the DOS prompt, type "D:" then push "ENTER", where "D:" is the letter of your CD-ROM drive

Type "Install" then push "ENTER", and follow the on-screen instructions
